## IMarEST UAE branch seminar-Revolutionary CJC technology set to disrupt traditional oil purification

**A**t an IMarEST UAE branch technical meeting/seminar held recently, attended by 126 senior executives from the shipping industry, CC JENSEN unveiled their groundbreaking technology in oil filtration. Leveraging decades as the trusted engineering partner for lube oil & hydraulic oil maintenance, they have invested years of research & successful field testing to create revolutionary technology to replace the Lube & Diesel Oil Purifiers, reducing environmental impact, ensuring equipment reliability, and a cost-saving saving solution.

maintainance in his informative introduction. He emphasized that 80% of machinery failures related to oil are due to contamination, making maintainance a critical factor for ensuring optimum equipment reliability and preventing system breakdown. Drawing from his shipboard experience, he shared the challenges of maintaining equipment in a purifier room and expressed a keen interest in operator-friendly alternate technologies that offer the continuous provision of a clean and dry oil, promoting reliable equipment operation and sustainable vessel earnings.

In an informative group presentation, **KIM KJÆR** (Global Segment Manager, Marine – Offshore, C.C JENSEN) and **REZA AZIMI-VISHTEH** (BDM, Marine segment, C.C JENSEN) explained that Lubrication oil must be maintained clean, dry, and in a proper chemical, condition to protect the engine. During operation, this oil gets contaminated by: particles, water, acid, and oxidation, reducing lifetime, reliability, and efficiency. With the appropriate maintenance strategy, it is possible to keep engines reliable, extend TBO, and save costs. After extensive research and trials with major shipowners and engine makers, audited by independent consultants specializing in energy saving, a new groundbreaking and sustainable filtration system technology, has been launched by CC JENSEN which has proven to reduce OPEX

through energy and oil savings, reduce carbon footprint and comply with engine lube standards on 2- and 4-stroke engines. Svendborg-headquartered C.C. JENSEN leverages technologies proven over many years when

developing new systems. They tested the new CJC® Engine Lube Oil Treatment Solution - to analyze what the effects would be on Additives, Wear

**NIKHEEL IDNANI (Honorary Secretary of IMarEST UAE Branch),** highlighted the significance of preventive oil

**Best Employer for Container Fleet Seajob Indian Anchor Awards- 2022**

Eastaway owns a diverse global fleet of 58 container vessels. Eastaway entered into a shipbuilding contract for 29 container ships, delivery commenced from September 2022 onwards & to be completed in 2 years timelines.

### COMPANY BENEFITS :

1. Quick placement
2. Insurance for INDIAN officers and their immediate family
3. WI-FI on board for all ranks
4. Wages on time before month end and to market standards

### Urgent requirements.

**2nd Officer, 3rd Officer, 3rd Engineer, and 4th Engineer. EL/Off - COC/ Non-COC Holders (Extra Allowance for Crane exp) Bosun / Cook (USD1700) AB / Oiler with COP (USD 1400) Candidates should have container experience.**

and fuel elements, Water and TBN, Viscosity, and insoluble. An Offline CJC Oil Filter was run in parallel with conventional centrifugal separators, but with only the CJC® solution operating. There were robust results in terms of cleanliness & performance during the 5000 hours trial of a 58,000 kW M/E with the engine maker's approval. Typical drivers for retrofitting this innovative technology include 60% less oil consumption, 99% reduction in lube oil sludge, over 90% reduction in CO2 emissions, and 97% energy savings. The installation of the CJC® Engine Lube Oil Treatment Solution uses existing piping and merely needs electrical wiring which makes it simple to install.

Preparing for a future of sustainability, during the information-rich, focused evening of presentations and panel discussions, Reza said, "Although CC JENSEN's technology is new, compared with normal purifiers, we have already over 2000 installed CJC lube oil & Diesel fuel filters globally. Therefore, we have no doubt about its functionality or sufficiency. CJC filter does the same job as normal purifiers, if not better."

Nikeel highlighted that the IMarEST is a non-profit organization recognized for its environmental, social, and governance practices. He emphasized their commitment to providing an impartial platform for disseminating world-leading technical research by companies, such as CC JENSEN, at the forefront

of marine technology. IMarEST is committed to facilitating knowledge sharing with all patrons, without discrimination based on gender, designation, place of work, or employer, enhancing the credibility built since 1889. The IMarEST UAE branch upholds the status, standards, and expertise of marine professionals, making a difference locally by opening doors to anyone interested in enhancing their marine knowledge, and driving the competence of the maritime fraternity.

After 70 years as the marine industry's go-to partner for Lube oil & Hydraulic oil maintenance, CC JENSEN has invested years of research and field tests to create something truly special. CJC's technology generated a lot of interest

Panel interaction with audience

among marine engineers present in the audience due to its impressive ROI and simplification of maintenance. In a Q&A session, the 126 participants had the opportunity to interact with four panelists: SOHAIL NAZIR (Fleet Manager at ONEX), Dr. IBRAHIM BEHAIRY (Managing Director Middle East at WinGD),

MOHAMMAD SABIR (Director of Ship Management Technical at Hapag Lloyd Shipmanagement) and KIM KJÆR. The intellectually stimulating conversations around economic advantages and carbon footprints were thoroughly engaging, absorbing, and enjoyable. C.C. JENSEN treated
